K-12 Digital Curriculum

Prentiss County School District (hereafter referred to as PCSD) is soliciting vendors to participate in a reverse auction for electronic and digital curriculum materials for math and ELA for grades K-12. PCSD has an expressed commitment to quality, accuracy & accessibility in the selection of digital materials, including alignment to Mississippi College and Career Readiness Standards. All submissions must include a comprehensive strategy for providing professional development for district teachers and staff.

Central to the needs of the District are products that entail the following:

- Digital Resources:

- may include a fully web-based version of the complete curriculum, including interactive, and multimedia features appropriate for student use, and including home use
- may include supplemental digital materials and enhancements such as virtual manipulatives, interactive games, and video appropriate for collaborative and individual learning environments
- may include online professional development components and additional instructional planning resources for teachers
- all electronic resources, digital components, features, demonstrations, virtual labs, and content must be fully accessible and operational on Apple iOS, MacOS and Windows 10 platforms at minimum
- Flash-only video resources must also be available in HTML5 or comparable language for iOS delivery. All digital content must be exportable as PDF or locally stored library on a student device, even if temporarily, for students needing to access material while offline. (other offline accessibility features and options will be considered and evaluated)
- Students Information System Synchronization:
 - All digital and non-digital resources requiring rostering or the loading of class lists, teacher lists, and/or course schedules must be compatible with data housed in SAMS (Central Access) and Canvas learning management system (Instructure). Preference will be given to vendors with the ability to sync through a vendor-provided roster import tool. Manual-only rostering options will not be considered as viable and sustainable curriculum resources. The use of vendor-provided import tools must be included as part of the base price for purchase and not offered as additional, for-purchase add on features.
- Differentiated Instruction
 - Must include intervention and enrichment opportunities as well as materials to support differentiation. Clear outline of various learning formats and opportunities for hands-on strategies and engaging activities. Students are provided opportunities to respond through various modalities: visual, auditory, and kinesthetic. Instructional materials and supplemental resources should adhere to the principles of universal design for learning (UDL).
- Prices
 - The Bidder shall prepare a proposal that describes their best commodities that the offeror desires to make available and the appropriate pricing structure.
 - All prices must be quoted less any Federal Excise or Sales Taxes from which PCSD is exempt.
 - All proposals must include shipping charges. Shipments will be made to each school individually.
 - Proposals must be signed by an individual authorized to bind the vendor to a contract.

- Prices must be guaranteed firm offers from the date of reverse auction through allowing sufficient time to evaluate proposed electronic textbooks and digital resources for instructional purposes.
- All proposals must be for the latest, most current edition or publication date
- Please list pricing per year as well as any price break points on contract. (For example, if purchasing 3 years on one contract costs less than single year renewal fees please include that information in the submission.)
